## PROFESSIONAL SUMMARY

---

Full Stack SaaS Engineer with 3 years of experience architecting high-performance web applications and scalable APIs. Currently learning Solutions Architecture through Udemy, with a focus on scalable cloud infrastructure and robust B2B SaaS platforms. Extensively experienced in integrating complex external systems, including Shopify GraphQL APIs, TikTok Shop, AfterShip, and Microsoft Outlook.

## TECHNICAL SKILLS

---

**Cloud & Arch** Solutions Architecture (Learning via Udemy), Microservices, Monorepo Architecture (Turborepo/pnpm)

**Frontend:** TypeScript, Javascript, Next.js, React.js

**Backend:** NestJS, Node.js, Express.js, RESTful & GraphQL APIs

**Third-Party Integrations:** Shopify APIs, TikTok Shop, AfterShip, Microsoft Outlook APIs

**Databases & Tools:** PostgreSQL, MongoDB, WebStorm

## EMPLOYMENT

---

### Full Stack SaaS Engineer | ISS ([Servia Helpdesk](#))

Nov 2025 – Present

- Spearheaded the full-stack architecture of a centralized B2B multi-channel customer support platform using Next.js and Node.js.
- Engineered advanced API integrations including Shopify GraphQL APIs for e-commerce syncing, TikTok Shop, AfterShip tracking, and Microsoft Outlook.
- Consolidated disparate merchant queries into a single, high-performance real-time dashboard, optimizing support workflows.

### Full Stack Engineer | Scaylar Technologies ([Expert One](#))

Oct 2025 – Nov 2025

- Architected and delivered the robust frontend architecture for a high-traffic location-based service booking platform.
- Engineered optimized user interfaces with advanced search filtering and dynamic state management.

### MERN Stack Developer | Rev9-Solutions ([Career Year](#))

Jan 2024 – Oct 2025

- Scaled a feature-rich sports quiz ecosystem utilizing Next.js for client UI and NestJS for backend business logic.
- Implemented real-time scoring engines, role-based admin dashboards, and secure JWT authentication.
- Engineered optimized MongoDB data models to track user attempts and generate automated performance metrics.

### React Developer | Rev9-Solutions ([VAYAFAC](#))

Sep 2023 – Jan 2024

- Designed and built a responsive, highly secure React.js/Next.js UI for a mission-critical financial payment gateway.
- Developed strict client-side validation logic and integrated REST APIs with real-time transaction handling.

## KEY PROJECTS

---

**[Servia](#) – B2B Customer Support Helpdesk:** Architected a centralized multi-channel helpdesk dashboard integrating Shopify GraphQL APIs, TikTok Shop, AfterShip, and Microsoft Outlook. Streamlined real-time merchant support workflows using Next.js, Node.js, and Turborepo monorepo architecture.

**[Career Year](#) – Sports Quiz Ecosystem:** Scaled a full-stack platform utilizing Next.js, NestJS, and MongoDB, featuring real-time scoring engines, robust JWT authentication, and a role-based administrative dashboard for performance tracking.

**[VAYAFAC](#) – Financial Payment Gateway:** Designed a responsive, secure cross-device payment UI using React.js and Next.js, implementing strict client-side validations and RESTful API integrations for real-time transaction state management.

**MockMaster – Mock Interview Platform:** Developed an interactive, low-latency platform featuring real-time Q&A and AI-driven feedback, powered by Next.js, Node.js, and Socket.io for seamless peer-to-peer interview sessions.

## EDUCATION & CERTIFICATIONS

---

Solutions Architecture (Learning via Udemy)

**Bachelor of Science in Computer Science (BSCS) | Punjab University**

Dec 2021 – May 2025

CGPA: 3.28
